

cork parquet

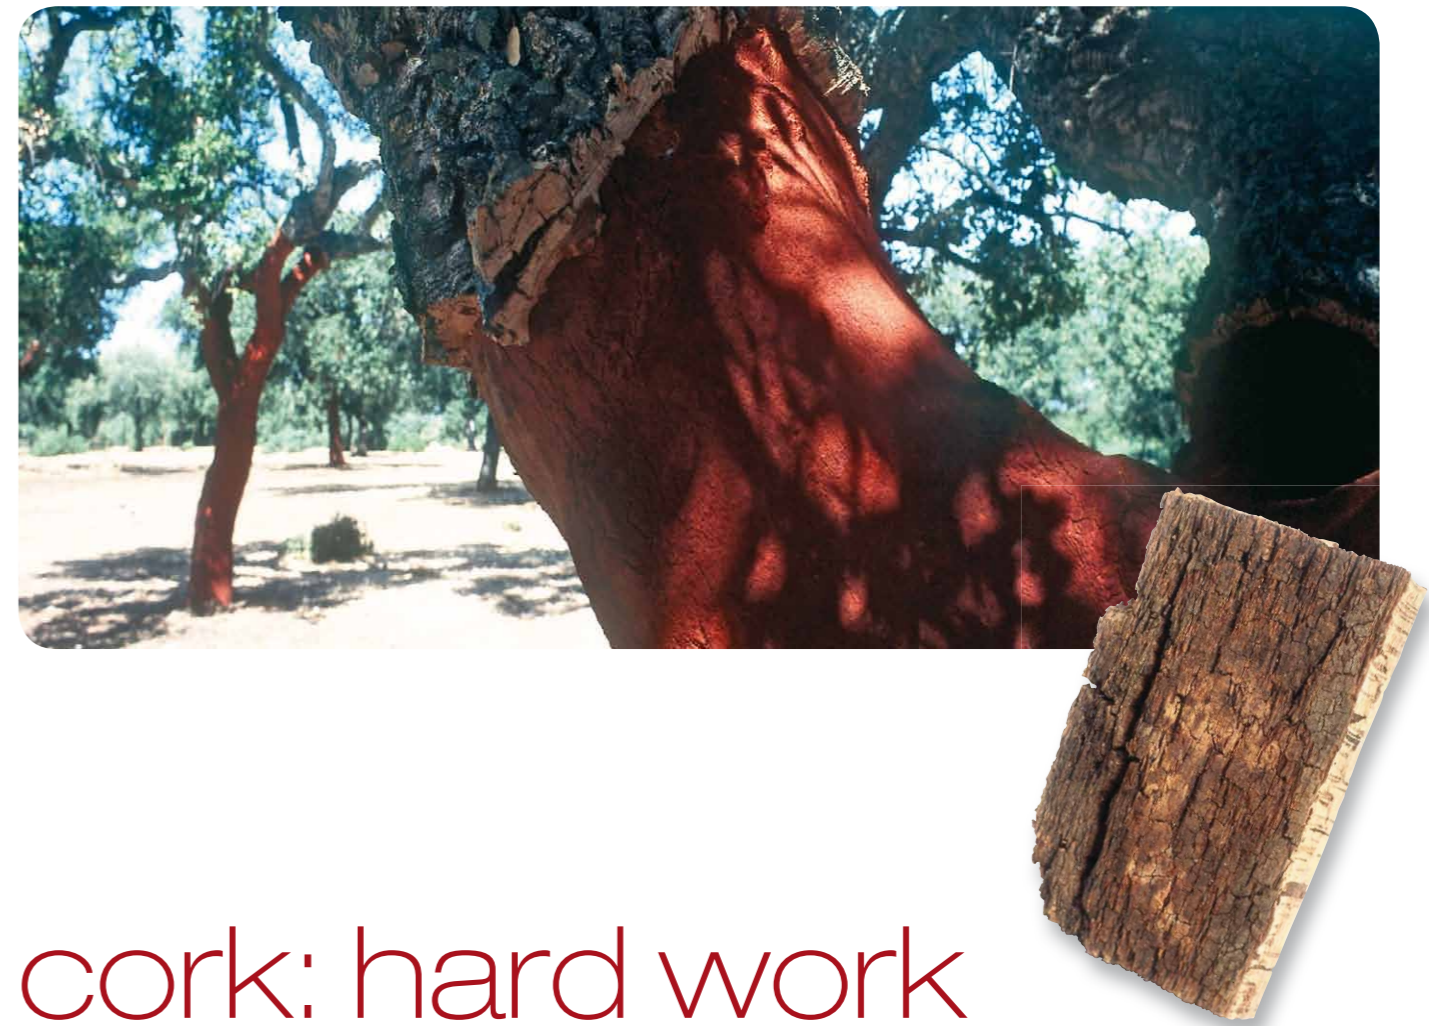

The natural flooring experience.

coloured cork parquet

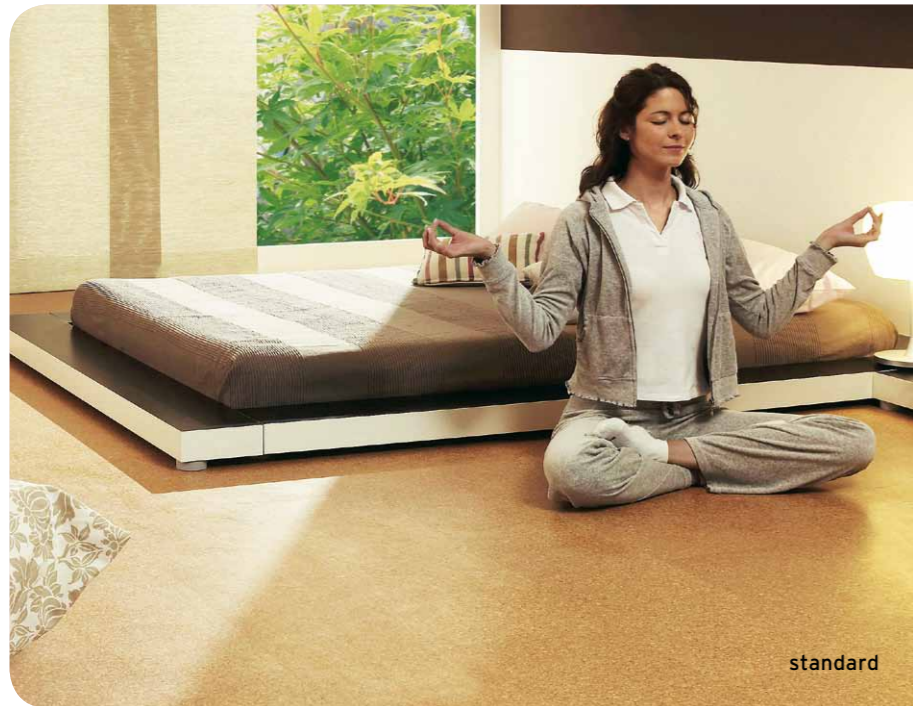

cork: hard work – valuable yield

For up to 200 years, the cork oak yields the most valuable raw material that nature has to offer humankind. The renewable bark, the cork, is harvested every ten years. For our quality floors, we use cork from the large Portuguese and Spanish cork oak forests.

The bark and waste bark from bottle cork production are processed into granulate in mills and pressed into blocks at high temperature and under high pressure. The material is cut into sheets and further processed into boards and panels.

Part of the production is finished with a layer of cork veneer. Finally the cork flooring is given a high quality finish. You have the choice of hot-air-dried hard wax oil, water-based varnish, UV-cured PU varnish.

Cork is a natural product that is subject to small variations in colour. The colour patterns may also differ from the original due to the limitations of colour printing. These facts do not constitute a fault.

cork parquet – multilayered & attractive

waterborne finish/wax/oil

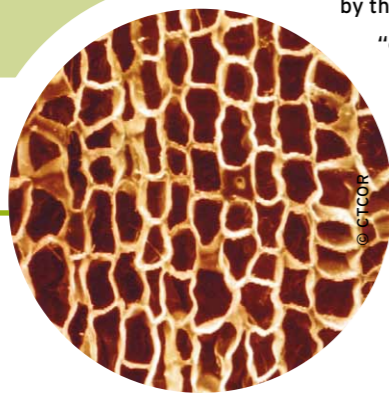

high quality cork veneer

cork base material

Our attractive cork parquet flooring is installed in a permanent way, bonded to the subfloor. Whether solid cork with different granulate structures or with a veneered surface, cork is extraordinarily hardwearing. After the installation, all you have to decide is whether you wish to varnish, wax or oil your dream flooring, depending on your individual requirements.

It is only under the electron microscope that it becomes visible what cork can really do. With over 30 Million air cells per cubic meter, cork cushions every step, warming your feet and absorbing sound. And it is good for your back too!

The high quality of our products is recognized and confirmed by the quality seal of the German Cork Association, the "cork logo"

The testers of the "Ökotest" magazine have rated our "Cortex natur/standard" parquet as very good, which gives us great confidence.

protection and perfect care

To get the most out of your floor for many years to come, you should take care of it correctly from the outset. The Cortex range of maintenance products is perfectly matched to our floors.

We especially recommend our line of care products for oiled and lacquered surfaces as an all-round, easy package (which includes a wet mop) for the initial and regular care of your new floor.

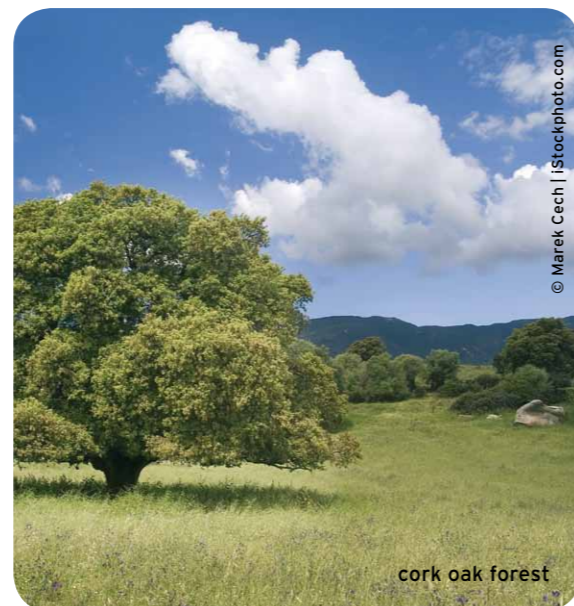

exclusive benefits of cork

Here is a summary of some of the major advantages that this natural product has to offer.

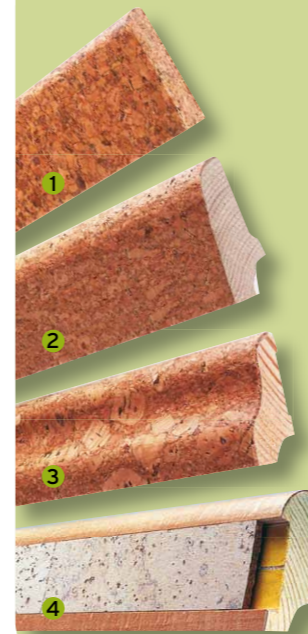

Cork is...

- ... wonderfully warm under foot
- ... highly elastic and easy on the joints
- ... hardwearing
- ... antistatic
- ... easy to maintain
- ... antibacterial and hygienic, recommended for allergy sufferers
- ... thermally insulating to save heating costs
- ... impact sound absorbing up to 20 dB
- ... suitable for underfloor heating
- ... a pure natural product made of renewable materials.

suitable accessories

The right accessories to complement your floor!

Matching skirt boards provide a harmonious finish for each floor. Our range of accessories leaves nothing to chance.

Here you can find skirting boards made from cork 1 or solid wood with cork veneer 2 in most designs from our collection.

We carry skirting boards in various diameters, straight or curved 3. An especially exquisite solution is maple or beech veneer with a groove to inlay cork strips 4.

For sound and thermal insulation we also offer cork underlay and cork panels in material thicknesses of 2 to 10 mm.

You can also find more interesting facts about our cork pre-finished parquet, maintenance and accessories on our website www.cortex.com.

Have a look also at our brochures on cork and linoleum glueless floating floors.

Cortex cork and linoleum products are available from your local flooring specialist:
