

glueless floating floor linoleum

The natural flooring experience.

linoleum – pure nature

Linoleum consists of renewable materials such as linseed oil, wood flour and powdered cork, ground limestone and jute, and is manufactured by an extremely low-energy production process.

It has antibacterial properties and is easy to clean and care for: dust and dirt are easily wiped away with a damp cloth.

Linoleum withstands even the heaviest demands. That's why it has been successfully used in schools and hospitals for a century and a half.

With its click joint, Cortex Linocor can also be laid in residential buildings simply, quickly and gluelessly. The HDF base material is specially impregnated, giving it

good protection against swelling due to water.

The factory applied finish gives the linoleum surface special protection against dirt and the effects of use.

Load class 23 - residential use

Load class 32 - commercial use

curtains up for an all round talent

linocor tabac, curry and champagner

I admit: I love harmony.

In the company of my family as well as in a stylish living atmosphere.

Beautiful, elegant but also hard-wearing and durable, this is not a contradiction when it comes to cortex linocor.

With it, I can draw from endless resources in every sense: I can choose from 14 wonderful, homely colors and set unique and dream floors.

Sound, natural, antistatic and antibacterial: these features are convincing even to my practical side.

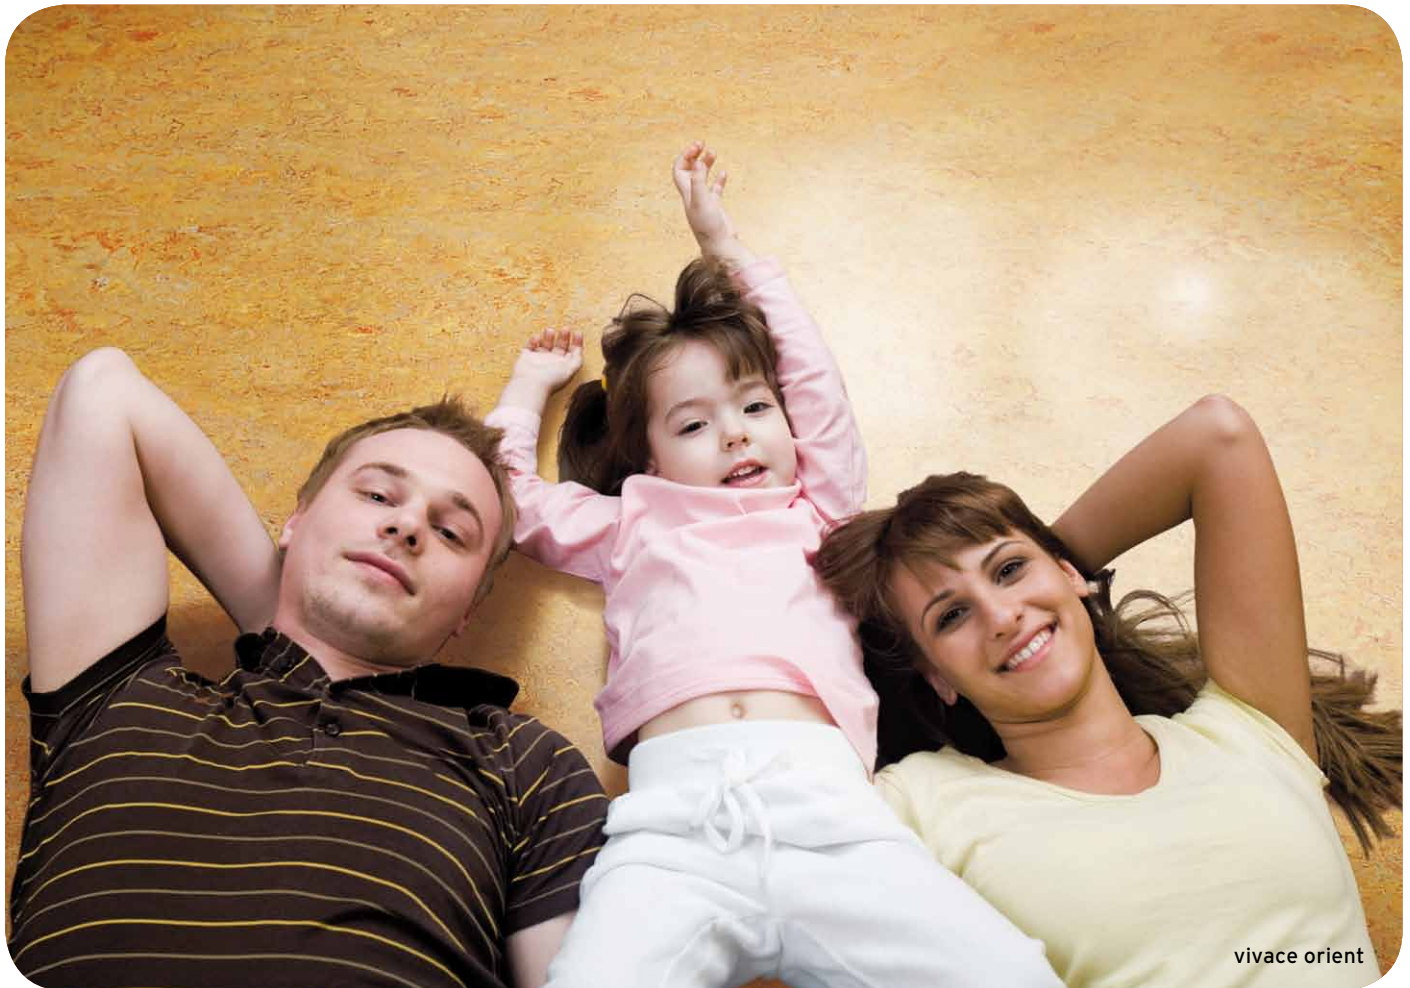

By the way: linocor is particularly insensitive against dirt and traces of usage and, therefore, extremely easy to clean.

care products

To get the most out of your floor for many years to come, you should care for it correctly from the outset. The Cortex range is perfectly matched to your floors. We recommend purchasing our care products as a complete package for initial and follow-up care of your new floor.

- Cortex Finish as initial care for long-lasting protection against humidity
- Cortex Polish added to the mop water for regular care
- Lobacare Neutral Cleaner added to the mop water for regular cleaning
- Lobacare Wax Remover for thorough cleaning
- Care products for varnish as a complete package, incl. finish, polish, neutral cleaner and a mop

suitable accessories

skirting

Matching skirting rounds off any floor perfectly. Choose the skirting to match the shape and colour: Maple or beech veneered, with recess and two-sided adhesive tape for inserting cork strips.

Format: 20 x 45 x 2700 mm

cork underlay

We offer material thicknesses of 2 to 6 mm for impact sound absorption and heat insulation. Cork underlay is also suitable for manufacturing notice boards. It is also available as boards.

Please also refer to our brochures on cork parquet and cork glueless floating floors.
